## SPEED DATING

Student sits in two rows opposite each other. Teachers asks one question, students in pairs answer the question and justify their answer. After 1-2 minutes students change, students from one row move right and change their seats.

Students may stand in a circle, every second students takes a step forward and turns so that they stand opposite another person. In this way two circles are formed, procedure is the same as in the version with rows.

## PICTURES AND ME

Ask your students to choose one or two photos which they have on their phones. They have to walk around the classroom, show their photos and talk about them with other students in the class.

## SILENT BIO

Work in pairs. One student interviews the other one to find the following things. The interviewee can't talk, he or she can only show the answers. Find out about:

- name
- age
- hobby
- favourite food
- things they don't like
- things they like
- sport they like or do
- ask about one other detail

When you have found out everything present your partner. Check if you have understood everything correctly.
